Thanks Sheila. So is there anyone else you are anticipating comments from?

I will review document and assume I will not have many comments.

So lets assume I have the most recent version and will be responsible for making any changes.

I think you have done the majority of work but I can take the responsiveness summary from here if there are any more comments. Please forward if you receive.

In terms of the errata, do you have the latest version. I can take a look and add or modify according to what I have.

Did you incorporate Eric's comments on CND?

In terms of next week, sounds like you will have your hands full with getting the data report ready, so I can take responsibility for responsiveness summary and errata, working with Jennifer/Eric on AR, and starting to make the changes to the report. I think we should set a goal for having everything done by the end of next week.

Thanks for leading the charge, I think we are close.

(b) (6) .

Relax this weekend.

Mike

Subject: Responsiveness Summary - use this version

Hi Mike,

I accepted all the changes and renamed the file. Please use this one if you make any changes or want to proofread it to make sure that I didn't introduce any errors when I made the changes.

I didn't have time to make any significant changes to the errata, but Jennifer is anxious to get it done so I sent it to her and she is maybe going to work on it this weekend. We should plan to try to finish the errata on Monday morning if we can and give it to Dan before the ET. The ET retreat starts at 11:30 on Monday and goes through Tuesday afternoon.

Dan is looking at the lagoon leakage calculations in the September report and will have some thoughts on whether we need to make revisions with respect to the references to NRCS on Monday.

Enjoy (b) (6) .
